# INSIGHT AND RECOMMENDATION

## 🔍 Key Insights

- Lagos leads overall sales performance
- Top reps (Sola, Aisha) drive majority of revenue
- Overall target achievement is strong (96%) but uneven across team
- High call rate does not always translate to high sales (efficiency gap)
- Stock levels are high in Ilorin & Onitsha → slow movement risk

## ⚠️ Key Risks

- Underperformance among some sales reps (<90% target)
- Overstock risk in certain regions
- Inefficient sales effort (high activity, low conversion)

## 💡 Recommendations

- Train low-performing reps to improve conversion
- Rebalance outlet coverage for better productivity
- Reduce stock in slow-moving regions
- Replicate strategies of top-performing reps
